

Integrated Care Model for plans purchased on the Health Insurance Marketplace benefits members and physicians

Published: Dec 1, 2018 - **Administrative**

An Integrated Care Model affords members with plans purchased on the Health Insurance Marketplace (also called the exchange) the ability to have continuity of care with each care management case. A single primary care nurse provides case and disease assessment and management. This continuity provides an opportunity for the member to get assistance working through an acute phase of an illness and then work with their nurse on the necessary behavioral changes needed to improve their health and enhance their well-being. The program is based on nationally recognized clinical guidelines and serves as an excellent adjunct to physician care.

The Integrated Care Model helps exchange members better understand and control certain medical conditions like diabetes, COPD, heart failure, asthma and coronary artery disease. Our nurse care managers are part of an interdisciplinary team of clinicians and other resource professionals who are there to support members, families, primary care physicians and caregivers.

Nurse care managers encourage participants to follow their physician’s plan of care; not to offer separate medical advice. In order to help ensure that our service complements the physician’s instructions, we collaborate with the treating physician to understand the member’s plan of care and educate the member on options for their treatment plan.
