

Keeping up with routine vaccination during COVID-19

Published: Jul 1, 2021 - State & Federal / Medicaid

Well-child visits and vaccinations are essential services

In May 2020, the CDC released a [report](#) showing a drop in routine childhood vaccinations as a result of COVID-19; a result of stay-at-home orders and concerns about infection during well-child visits. Both the American Academy of Pediatrics and the CDC recommend the continuation of routine childhood vaccinations during the COVID-19 pandemic, noting they are essential services.

To encourage well-visits and vaccinations, here are some extra steps you can take to ensure visits are as safe as possible for both patients and staff. They include:

- Scheduling sick visits and well-child visits during different times of the day.
- Asking patients to remain outside until it's time for their appointment to reduce the number of people in waiting rooms.
- Offering sick visits and well-child visits in different locations.

It is important to identify those children who have missed immunizations and well-child visits to schedule these essential in-person appointments. To help, the CDC has published [vaccine catch-up guidance](#) on their website.

Help your patients earn rewards

For additional encouragement, Anthem Blue Cross and Blue Shield Healthcare Solutions (Anthem) members can earn \$25 or more in gift cards for completing vaccines and/or well visits through our **Healthy Rewards** program. Please encourage your patients to enroll in the program on the Anthem website so they can earn rewards for these activities.

See chart below:

Anthem	Childhood Immunization Status Combo 10 (CIS-10)	Child and Adolescent Well Care Visits (WCV)
Ages	0 to 1 (before 2nd birthday)	15 months to 19 years
Reward amount	\$25	\$25

Patients can enroll online at mss.anthem.com/nv or by calling **1-888-990-8681 (TTY)**.

Helpful information for keeping babies and children healthy:

Childhood Immunization Status (CIS) Combination 10 HEDIS® measure requires that all children are immunized by their 2nd birthday:

- Four DTap (diphtheria, tetanus and acellular pertussis)
- Three IPV (polio)
- One MMR (measles, mumps, rubella)
