

Updates to AIM MSK Interventional Pain Management Clinical Appropriateness Guideline

Published: May 1, 2020 - **Products & Programs**

Effective for dates of service on and after August 16, 2020, the following updates will apply to the AIM Musculoskeletal Program: Interventional Pain Management Clinical Appropriateness Guideline.

Musculoskeletal Program: Interventional Pain Management Guideline:

General requirements – conservative management

- Addition of physical therapy or home therapy requirement and one complementary modality based on preponderance of benefit over harm to conservative care
- Align with approach to conservative management defined in spine and joint surgery guidelines

Epidural injection procedures and diagnostic selective nerve root blocks

- Addition of statement about adherence to ESI procedural best practices established by FDA Safe Use Initiative. Recommendations are intended for provider education and will not be used for adjudication.
- Clarification of intent around requirement for advanced imaging for repeat injections

Paravertebral facet injection/nerve block/neurolysis

- Remove indication for 4 unilateral medial branch blocks per session based on panel consensus
- Procedural clarification restricting use of corticosteroids for diagnostic MBB based on panel consensus
- Limit use of intra-articular steroid injection to mechanical disruption of a facet synovial cyst
- Remove indication for intra-articular steroid injections based on new evidence for lack of efficacy

- Increase duration of initial RFN efficacy needed to avoid a MBB to 6 months based on panel consensus
- Clarification that MBB or RFN is not medically necessary after spinal fusion

Spinal cord and nerve root stimulators

- Clarify inclusion of different stimulation methods for spinal cord stimulation
- Add new indication for dorsal root ganglion stimulation
- Clarify exclusions for spinal cord and dorsal root ganglion stimulation
