Register now for our August CME webinars

Published: Aug 1, 2021 - Administrative

Join us throughout the year in a new Continuing Medical Education (CME) webinar series as we share practices and success stories to overcoming barriers in achieving clinical quality goals, attaining better patient outcomes and improving STARs ratings.

Program objectives:

- Learn strategies to help you and your healthcare team improve your performance across a range of clinical areas.
- Apply the knowledge you gain from the webinars to improve your organization's quality and STARs ratings.

Attendees will receive one CME credit upon completion of a program evaluation at the conclusion of each webinar.

Telehealth visits can impact after hospitalization follow-up care for mental illness

Published: Aug 1, 2021 - Administrative

Reductions in missed appointments are significant

Telehealth visits are having a significant impact on missed appointments according to a study published in [Counselling Psychology Quarterly](#). Prior to transitioning to telehealth, clinicians in the study “Psychotherapy at a public hospital in the time of COVID-19: telehealth and implications for practice,”¹ experienced a 14.25% missed appointment rate. After transitioning to telehealth, the missed appointment rate fell to 5.63%.

Rate of missed appointments before and after transitioning to telehealth

The graph below illustrates the changes in the average rate of missed appointments (cancellations and no-show) for each of the eight clinicians in the study between the periods before and after the transition to telehealth.

<https://www.tandfonline.com/doi/full/10.1080/09515070.2020.1777390>

“While there are a number of limitations to consider regarding this data, [which is further discussed in the study], the statistically significant reduction in missed appointments pre- and post [digital] transition is striking,” cited in the study report.

Telehealth and telephone visits with members after a behavioral health (BH) inpatient stay meet HEDIS[®] criteria for the measure: Follow-up after Hospitalization for Mental Illness (FUH). With transportation being one of the barriers to after hospitalization follow-up, telehealth visits could be an ideal solution.²

The FUH HEDIS measure evaluates:

- Members 6 years and older who were hospitalized for treatment of selected mental illness diagnoses and who had a follow-up visit with a mental health practitioner.

Two areas of importance for this HEDIS measure are:

1. The percentage of behavioral health inpatient discharges for which the member received follow-up within 7 days after discharge.
2. The percentage of behavioral health inpatient discharges for which the member received follow-up within 30 days after discharge.

These two consecutive follow-up appointments are paramount to positive outcomes as well as meeting this HEDIS measure. Telehealth visits can greatly increase the likelihood of keeping follow-up appointments leading to reduced numbers of re-hospitalization and more favorable outcomes for these patients. To learn more about the [FUH HEDIS measure](#), visit the [NCQA website](#).

Clearing up coding confusion for retinal eye exams (DRE)

Published: Aug 1, 2021 - Administrative

3072F: new language about two-year compliance

The Comprehensive Diabetes Care HEDIS[®] Measure Retinal Eye Exam (DRE) values the percent of adult members ages 18 to 75, with diabetes (type 1 and type 2), who had a retinal eye exam during the measurement year.

Changes to 3072F

The definition for the code 3072F (negative for retinopathy) has been redefined to: Low risk for retinopathy (no evidence of retinopathy in the prior year). This can be particularly confusing because it would not be used at the time of the exam. It would be used the following year, along with the exam coding for the current year, to indicate that retinopathy was not present the previous year.

A simpler coding solution

Using these three codes count toward the DRE measurement if they are billed in the current measurement year, or the prior year. This means you can submit the appropriate code at the time of the exam, and it covers both years:

CPT Code	Description
2023F	Dilated retinal eye exam with interpretation by an ophthalmologist or optometrist documented and reviewed; without evidence of retinopathy (DM)
2025F	7 standard field stereoscopic retinal photos with interpretation by an ophthalmologist or optometrist documented and reviewed: without evidence of retinopathy (DM)
2033F	Eye imaging validated to match diagnosis from 7 standard field stereoscopic retinal photos results documented and reviewed: without evidence of retinopathy (DM)

For more about diabetic retinopathy, visit [CMS.gov](https://www.cms.gov) or use [this link to read more](#).

Meeting the measurement for all diabetes care

These exams are also important in evaluating the overall health of diabetic patients, as well as meeting the Comprehensive Diabetes Care HEDIS measure:

- Hemoglobin A1c (HbA1c) testing
- HbA1c poor control (>9.0%)
- HbA1c control (<8.0%)
- Retinal Eye exam performed
- Blood Pressure control (<140/90 mm Hg)

Record your efforts in the member's medical records for the HbA1c tests and results, retinal eye exam, blood pressure, urine creatinine test and the estimated glomerular filtration rate test. Meeting the mark and closing gaps in care is key to good health outcomes.

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

New! Schedule appointments online through Availity

Published: Aug 1, 2021 - **Administrative** / Digital Tools

We're making it even easier for you to schedule online appointments through the Appointment Scheduler App on [Availity](#). The Appointment Scheduler App gives you secure access to new appointment requests. You'll also receive digital access to the member's ID number, contact information and any special health information.

Appointment Scheduler App features include:

- Manage appointment requests
- Configure appointment availability
- Notifications for new visit requests on your Availity dashboard
- Members are automatically notified by text or email when appointments are confirmed

The screenshot displays the Availity dashboard interface. At the top left, a 'Welcome' box reads: 'Your One-Stop Shop! Explore important proprietary information available in the Applications and Resources tabs.' To the right is a photo of a smiling healthcare professional holding a tablet. Below this is a navigation bar with tabs for 'Applications', 'Resources', and 'News and Announcements', and a 'Sort By' dropdown set to 'A-Z'. Three application cards are visible: 'Custom Learning Center' (Find payer-centric training and resources in the learning center.), 'Appointment Scheduler' (Configure appointment availability and manage appointment requests from patients), and 'Authorization Rules Lookup' (Commercial Products Check if an outpatient procedure requires authorization.). The 'Appointment Scheduler' card is highlighted with a red heart icon.

Administrators, administrator assistants and users with the role of “office staff” will have access to the Appointment Scheduler App.

Article Attachments

To access Appointment Scheduler , log onto Availity.com and select Anthem from Payer Spaces. The Appointment Schedule App will be located in your Applications menu. To learn more about the new App, visit the Custom Learning Center in Availity for the Appointment Scheduler Application Reference Guide.

Anthem to update formulary lists for commercial health plan pharmacy benefit effective October 1, 2021*

Published: Aug 1, 2021 - **Products & Programs** / Pharmacy

**Material Adverse Change (MAC)*

Effective with dates of service on and after October 1, 2021, and in accordance with the IngenioRx Pharmacy and Therapeutics (P&T) process, Anthem will update its drug lists that support commercial health plans.

Updates include changes to drug tiers and the removal of medications from the formulary.

Please note, this update does not apply to the Select Drug List and does not impact Medicaid and Medicare plans.

To ensure a smooth member transition and minimize costs, providers should review these changes and consider prescribing a drug on formulary or on a lower tier, if appropriate.

[View a summary of changes here.](#)

1270-0821-PN-CNT

Updates for specialty pharmacy are available - August 2021*

Published: Aug 1, 2021 - Products & Programs / Pharmacy

*Material Adverse Change (MAC)

Prior authorization updates

Effective for dates of service on and after November 1, 2021, the following specialty pharmacy codes from current or new clinical criteria documents will be included in our prior authorization review process.

Please note, inclusion of National Drug Code (NDC) code on your claim will help expedite claim processing of drugs billed with a Not Otherwise Classified (NOC) code.

[Access the Clinical Criteria information here.](#)

Prior authorization clinical review of non-oncology use of specialty pharmacy drugs is managed by the medical specialty drug review team. Review of specialty pharmacy drugs for oncology use is managed by AIM Specialty Health® (AIM).

Clinical Criteria	HCPCS or CPT Code(s)	Drug
**ING-CC-0196	J3490 J9999 J3590	Zynlonta
**ING-CC-0197	J3490 J3590 J9999	Jemperli
*ING-CC-0199	J3490 J3590 C9399	Empaveli

* Non-oncology use is managed by the medical specialty drug review team.

** Oncology use is managed by AIM.

Quantity limit updates

Effective for dates of service on and after November 1, 2021, the following specialty pharmacy codes from current or new clinical criteria documents will be included in our quantity limit review process.

Please note, inclusion of National Drug Code (NDC) code on your claim will help expedite claim processing of drugs billed with a Not Otherwise Classified (NOC) code.

[Access the Clinical Criteria information here.](#)

Prior authorization clinical review of non-oncology use of specialty pharmacy drugs is managed by the medical specialty drug review team. Review of specialty pharmacy drugs for oncology use is managed by AIM Specialty Health® (AIM).

Clinical Criteria	HCPCS or CPT Code(s)	Drug
*ING-CC-0199	J3490 J3590 C9399	Empaveli

Specialty dose rounding program for certain oncology medications

Published: Aug 1, 2021 - **Products & Programs** / Pharmacy

Providers treating members covered by Anthem Blue Cross and Blue Shield (Anthem) plans will be asked in selective circumstances to voluntarily reduce the requested dose to the nearest whole vial for over 40 oncology medications (see list below). Reviews for these oncology drugs will continue to be administered by AIM Specialty Health® (AIM).

As part of the online prior authorization process, providers will be asked about the dosage of the medication being requested in pop-up questions:

- Whether or not the recommended dose reduction is acceptable
- If the patient is considered unable to have his or her dose reduced, then a second question will appear asking for the provider's clinical reasoning.

For prior authorization requests made outside of the online AIM Provider Portal (i.e. via phone or fax) the same questions will be asked by the registered nurse or medical director reviewing the request. **Since this program is voluntary, the decision made regarding dose reduction will not affect the final decision on the prior authorization.**

The dose reduction questions will appear only if the originally requested dose is within 10 percent of the nearest whole vial. This threshold is based on the current medical literature and recommendations from the Hematology and Oncology Pharmacists Association (HOPA) it is appropriate to consider dose rounding within 10 percent. [Click here](#) to view the HOPA recommendations.

The voluntary dose reduction program only applies to the specific oncology drugs listed below. Providers can view prior authorization requirements for Anthem members on the Medical Policy & Clinical UM Guidelines page at [anthem.com](https://www.anthem.com).

Note: In some plans “dose reduction to nearest whole vial” or another term “waste reduction” may be the term used in benefit plans, provider contracts or other materials instead of or in addition to “dose reduction to nearest whole vial” and in some plans, these terms may be used interchangeably. For simplicity, we will hereafter use “dose reduction (to nearest whole vial).”

Providers should continue to verify eligibility and benefits for all members prior to rendering services.

If you have questions, please call the Provider Service phone number on the back of the member's ID card.

Drug Name	HCPCS Code
Abraxane (paclitaxel protein-bound)	J9264

URL: <https://providernews.anthem.com/wisconsin/article/specialty-dose-rounding-program-for-certain-oncology-medications-2>

Specialty dose rounding program for certain non-oncology medications beginning August 1, 2021

Published: Aug 1, 2021 - **Products & Programs** / Pharmacy

Effective with dates of service on or after August 1, 2021, providers treating members covered by Anthem Blue Cross and Blue Shield (Anthem) Commercial plans may be asked to consider voluntarily reducing the requested dose to avoid vial wastage for select non-oncology specialty medications. The dose reduction suggestion will only be made if the originally requested dose is within 10% of the nearest whole vial.

Since this program is voluntary, the decision to participate will not affect the final decision on the prior authorization.

Reviews for these specialty drugs will continue to be administered by IngenioRx®.

As part of the prior authorization process, providers may be asked the following questions:

- Whether the suggested dose reduction is clinically acceptable
- Clinical reasoning if the dose reduction is not appropriate

Providers can view prior authorization requirements for Anthem members on the Medical Policy & Clinical UM Guidelines page at [anthem.com](https://www.anthem.com).

Providers should continue to verify eligibility and benefits for all members prior to rendering services.

If you have questions, please call the Provider Service phone number on the back of the member's ID card.

Immune globulin adjusted body weight dosing program beginning August 1, 2021

Published: Aug 1, 2021 - **Products & Programs** / Pharmacy

Effective with dates of service on or after August 1, 2021, providers treating members covered by Anthem Blue Cross and Blue Shield (Anthem) Commercial plans may be asked to consider voluntarily using adjusted body weight (AdjBW) dosing compared to actual body weight (ABW) dosing for immune globulin medications. The dose change using AdjBW will only be made if the member's actual body weight is more than 20% of the ideal body weight (IBW).

Since this program is voluntary, the decision to participate will not affect the final decision on the prior authorization.

Reviews for the immune globulin medications will continue to be administered by IngenioRx® as these will specifically target specialty non-oncology indications.

As part of the prior authorization process, providers may be asked the following questions:

- Whether the suggested use of AdjBW and change in dose is clinically acceptable
- Clinical reasoning if the dose change (using AdjBW) is not appropriate

Providers can view prior authorization requirements for Anthem members on the Medical Policy & Clinical UM Guidelines page at [anthem.com](https://www.anthem.com).

Providers should continue to verify eligibility and benefits for all members prior to rendering services.

If you have questions, please call the Provider Service phone number on the back of the member's ID card.

Transition to AIM Specialty Health imaging of the heart clinical appropriateness guideline for computed tomography to detect coronary artery calcification

Published: Aug 1, 2021 - **Policy Updates** / Medical Policy & Clinical Guidelines

Effective November 1, 2021, Anthem Blue Cross and Blue Shield (Anthem) will transition the clinical criteria for medical necessity review of computed tomography to detect coronary artery calcification to AIM imaging of the heart clinical appropriateness guideline.

As part of this transition of clinical criteria, the following procedures will be subject to prior authorization at AIM:

CPT code	Description
75571	Computed tomography, heart, without contrast material, with quantitative evaluation of coronary artery calcium
S8092	Electron beam CT (also known as ultrafast CT, cine CT)

For questions related to guidelines, please contact AIM via email at aim.guidelines@aimspecialtyhealth.com.

Additionally, you may access and download a copy of the [current guideline here](#).

Reimbursement policy update: Virtual Visits (Professional and Facility)*

Published: Aug 1, 2021 - **Policy Updates** / Reimbursement Policies

**Material Adverse Change (MAC)*

Beginning with dates of service on or after November 1, 2021, Anthem Blue Cross and Blue Shield (Anthem)'s current Telehealth policy will be renamed Virtual Visits. Anthem allows reimbursement for professional and facility Virtual Visits when interactive services occur between the member and the provider, when they are not in the same location, unless provider, state, or federal contracts and/or mandates indicate otherwise. Reimbursement is allowed for professional and facility Virtual Visits rendered at the distant site via live audio visual services and for Remote Patient Monitoring. Services reported by a professional provider with a place of service Telehealth (02) will be eligible for non-office place of service reimbursement. In addition, facility Virtual Visits will be allowed for the originating site fee. The Related Coding section details the modifiers allowed for reimbursement.

For more information about this policy, visit the [Reimbursement Policy page](#) at [anthem.com](https://www.anthem.com).

1267-0821-PN-CNT

Reimbursement policy update: Claims requiring additional documentation (Facility)*

Published: Aug 1, 2021 - **Policy Updates** / Reimbursement Policies

**Material Adverse Change (MAC)*

In our May *Provider News*, we announced a threshold increase for the itemized bill requirement for outpatient facility claims. This requirement will remain; however effective August 1, 2021, Anthem will remove the threshold amount from the policy language for outpatient facility claims and inpatient stay claims.

For more information about this policy, visit the [Reimbursement Policy page](#) at [anthem.com](#).

Change in email submission of service requests for Federal Employee Program® members*

Published: Aug 1, 2021 - **State & Federal** / Federal Employee Plan (FEP)

**Material Adverse Change (MAC)*

Effective November 1, 2021, in order to help ensure our member's security, the Blue Cross and Blue Shield Federal Employee Program (FEP®) will be decommissioning the Utilization Management (UM) email address for processing eReviews, FEPE-Reviews@anthem.com. **As an alternative**, FEP offers providers a secure online portal, Interactive Care Reviewer (ICR).

About the ICR portal

ICR is Anthem Blue Cross and Blue Shield (Anthem)'s innovative UM portal that allows providers, in addition to phone or fax, to submit prior authorization requests and to provide clinical documentation (including imaging) to support initial and continued stay reviews. This enables prior authorization requests and clinical information to be transmitted directly to UM staff.

-

Key features of the portal

- No cost electronic UM solution
- Instant access from any location at any time
- Create a UM preauthorization case and instantly submit it for review
- Attach clinical documents for review – no faxing required
- Check status of any case regardless of the method used to originally submit request
- Complete record of submissions and dispositions – all in one place
- Bi-directional communication

To submit prior authorization service requests electronically, register for use of ICR prior to **November 1, 2021** on the [Availity portal](#).

For more information on Anthem ICR, including training resources:

<https://www.anthem.com/provider/prior-authorization/interactive-care-reviewer/>

Register for ICR via the Availity portal: <https://www.availity.com/provider-portal-registration>

Need help registering? View this video: [How to Access Availity and Register](#)

-

As a reminder, in addition to using ICR on the Availity portal, you can submit authorizations, to FEP UM by phone or fax:

- FEP UM precertification toll free #: 800-860-2156
- FEP UM precertification fax #: 800-732-8318
- FEP UM advance benefit determination fax #: 877-606-3807

Preventing claims denials: Shingles vaccine

Published: Aug 1, 2021 - **State & Federal** / Medicare

Know best: Shingles vaccinations are a Medicare Part D benefit whether administered in your office or in the pharmacy

We want you to have the information you need when filing claims for our Medicare Advantage members so your payments are received quickly and effortlessly. The shingles vaccine and the administration of the vaccine is commonly billed in error under the member's Medicare Part B medical benefit. The shingles vaccination is a Medicare Part D pharmacy benefit, which requires the member to pay in advance of reimbursement. The member then submits the prescription drug claim form to their Medicare Part D plan for reimbursement.

You can also refer the member to the pharmacy for the vaccine. The claim is usually filed for the member by the pharmacy provider using a clearinghouse platform that enables Medicare Part D claims transactions. Or, if you have access to clearinghouse platforms that enable you to file pharmacy transactions, that is another option for administering the vaccination in your office and for further serving the member.

The Centers for Medicare & Medicaid Services (CMS) has a helpful resource, MLN Fact Sheet: Medicare Part D Vaccines, that offers an all-inclusive look into patient access, vaccine administration, and reimbursement. Use this link to [download a copy](#).
