Notification of New Codes for Applied Behavior Analysis (MO)

Published: Feb 1, 2019 - **Products & Programs** / Behavioral Health

Anthem Blue Cross and Blue Shield (Anthem) in Missouri would like to make you aware of changes to the Missouri Anthem Blue Cross and Blue Shield coding for Applied Behavior Analysis. The new coding will apply to covered services rendered on or after January 1, 2019 for plans that use the Blue Access®, Blue Access Choice®, Blue Preferred®, and the Exchange/Off Exchange Networks.

As you submit new and renewing treatment plans for your Anthem members, beginning with dates of service January 1, 2019, please request ABA services using the new codes set forth by the American Medical Association (AMA).

Current ABA treatment authorizations that have already been approved through 2019 will be updated to reflect the new codes for the portion of the service that falls in 2019. Updated authorization letters reflecting the changes to the authorization will be sent to members and providers. You do not need to call and request that this update to current authorization take place. Claims submitted for 2019 dates of service should reflect the new codes.

Please note that the online fee schedules provide allowable amounts for current as well as historical codes and rates. Fee schedules with an effective date of January 1, 2019 may be available online at Availity on or after February 1, 2019. Go to www.anthem.com/provider > select Missouri > select Find Resources for Missouri > and on the left side of the Provider home page log in to the Availity portal. Or go to www.availity.com and select the Anthem Provider Portal.

For treatment plans authorized effective January 1, 2019 or after, the only codes payable to Applied Behavior Analysts will be the new codes approved by the AMA. All other codes will be denied.

Requests for concurrent reviews and/or new authorizations will reflect the coding changes and should be billed to match what is authorized. Coding other than what is reflected in an authorization for ABA services should not be billed and is not covered.

Please contact your Network Consultant for any additional questions.

Member Satisfaction with Behavioral Health Outpatient Services (MO)

Published: Feb 1, 2019 - **Products & Programs** / Behavioral Health

Anthem Blue Cross and Blue Shield (Anthem) conducts an annual satisfaction survey of our member's behavioral health outpatient service experience. The random survey is conducted based on receipt of claims. We have recently reviewed the 2018 survey experience results and wanted to share highlights with our network of behavioral health providers.

The survey inquires about the member's satisfaction with:

- timeliness of treatment,
- practitioner service/attitude and office environment,
- care coordination (among the member's various providers),
- prescriptions/medication management process (if applicable),
- financial and billing process, and
- their perceived clinical improvement.

Our member is also asked to give an overall rating of the experience. The 2018 overall practitioner rating was 87% in Missouri, based on the survey results.

We were pleased to see overall improvement in the survey results. In particular, two areas of focus over the last year, access and coordination of care. Members responding to the survey, indicated that obtaining an appointment was fairly easy and many respondents indicated that care was being coordinated among their providers, including medical. Care coordination and collaboration, particularly medical-behavioral integration, is a key focus at Anthem. We also encourage ongoing understanding of an individual's cultural, spiritual and religious beliefs while in treatment.

While we are pleased with our member's experience with our participating provider network and thank you for your network participation and the services you provide, we'd like to remind you of two key areas to maintain and improve satisfaction:

Member's Access to Behavioral Health Care – As a participating provider please be reminded of Anthem's expectation, based on NCQA definitions, of access to behavioral healthcare to help ensure our members have prompt access to behavioral health care:

- **Non-Life Threatening Emergency Needs – must be seen, or have appropriate coverage directing the Member, within 6 hours.** When the severity or nature of presenting symptoms is intolerable but not life threatening to the member.
- **Urgent Needs – must be seen, or have appropriate coverage directing the Member, within 48 hours.** Urgent calls concern members whose ability to contract for their own safety, or the safety of others may be time-limited, or in response to a catastrophic life event or indications of active substance use or threat of relapse. Urgent needs have the potential to escalate into an emergency without clinical intervention.
- **Routine office visit – must be within 10 business days.** Routine calls concern members who present no immediate distress and can wait to schedule an appointment without any adverse outcomes.

We use several methods to monitor adherence to these standards. Monitoring is accomplished by a) assessing the availability of appointments via phone calls and surveys by our staff or designated vendor to the provider's office; b) analysis of member complaint data and c) analysis of member satisfaction. Providers are expected to make best efforts to meet these access standards for all members. Anthem continues to look at gaps, barriers and alternative options to improve access to behavioral healthcare including tele-health services.

Members Held Harmless – As a participating provider in Anthem's behavioral health provider network, a participating provider shall look solely to Anthem for compensation for covered services and under no circumstances shall render a bill or charge to any member except for applicable co-payments, deductibles and coinsurance and for services that are not medically necessary or are otherwise not covered, provided that the Provider obtains the consent of the Member before providing such service. We recommend that consent be in writing and dated, in order to protect our members and providers from disputes.

In addition, Anthem also reminds our participating providers that Anthem members must be advised of missed or cancelled appointment policies at the onset of treatment. We also recommend that the advisement be acknowledged by the member in writing, and that acknowledgement is dated.

Thank you again for the services that you provide to our members.

Clinical criteria updates for specialty pharmacy*

Published: Feb 1, 2019 - **Products & Programs** / Pharmacy

The following clinical criteria will be effective May 1, 2019.

Erythropoiesis Stimulating Agents ING-CC-0001

Clinical criteria ING-CC-0001 addresses the use of recombinant erythropoietin products, also known as erythropoiesis stimulating agents (ESAs), for the treatment of severe anemia in chronic kidney disease (CKD), HIV, cancer, surgery, and other conditions.

Effective for dates of service on and after May 1, 2019, the use of Procrit®, Epogen®, and Retacrit™ for the treatment of severe anemia in hepatitis C, chronic inflammatory disease, and bone marrow transplant are considered not medically necessary.

H.P. Acthar Gel® (repository corticotropin injection) ING-CC-0004

Clinical criteria ING-CC-0004 addresses the use of repository corticotropin injection for the treatment of infantile spasms (West syndrome) and adults with a corticosteroid-responsive condition, including but not limited to acute exacerbations of multiple sclerosis.

Effective for dates of service on and after May 1, 2019, repository corticotropin injections for the treatment of conditions other than infantile spasms (West syndrome) are considered not medically necessary.

Selective Vascular Endothelial Growth Factor (VEGF) Antagonists ING-CC-0072

Clinical criteria ING-CC-0072 addresses the use of intravitreal vascular endothelial growth factor (VEGF) antagonists for the treatment of diabetic retinopathy and other retinal disorders associated with neovascularization.

Effective for dates of service on and after May 1, 2019, the use of Eylea® for the treatment of radiation retinopathy is considered not medically necessary.

To access the clinical criteria information please visit our [Clinical Criteria](#) website.

Anthem expands specialty pharmacy prior authorization list*

Published: Feb 1, 2019 - **Products & Programs** / Pharmacy

Effective for dates of service on and after May 1, 2019, the following specialty pharmacy codes from new clinical criteria or current clinical guideline will be included in our prior authorization review process.

Please note, inclusion of NDC code on your claim will shorten the claim processing time of drugs billed with a Not Otherwise Classified (NOC) code.

Anthem's prior authorization clinical review of these specialty pharmacy drugs will be managed by AIM Specialty Health® (AIM), a separate company.

To access the clinical criteria information, please visit our [Clinical Criteria](#) website.

Anthem expands specialty pharmacy medical step therapy drug list*

Published: Feb 1, 2019 - **Products & Programs** / Pharmacy

The following clinical criteria will be effective May 1, 2019.

Colony Stimulating Factor Agents ING-CC-0002

Effective for dates of service on and after May 1, 2019, the following specialty pharmacy codes from new or current criteria will be included in our existing specialty pharmacy medical step therapy review process. Zarxio® will be the preferred short-acting colony stimulating factor (CSF) agent over Neupogen®, Granix®, and Nivestym™.

Anthem's prior authorization clinical review of these specialty pharmacy drugs will be managed by AIM Specialty Health® (AIM), a separate company.

Additional information regarding biosimilar drugs can be found by viewing the reference document, [Biosimilar Drugs – What are they?](#) here.

To access the clinical criteria information please visit our [Clinical Criteria](#) website.

HEDIS® 2019: Controlling High Blood Pressure (CBP)

Published: Feb 1, 2019 - **Administrative**

One of the measures Anthem Blue Cross and Blue Shield (Anthem) reports on is the Controlling High Blood Pressure (CBP) measure. This measure focuses on the percentage of members who are 18 to 85 years of age who had a diagnosis of hypertension and whose blood pressure (BP) was adequately controlled (<140/90 mm Hg) during the measurement year (2018).

What's new for 2019?

- The Controlling High Blood Pressure (CBP) measure is no longer strictly a hybrid measure, which means that we review both medical records and claims. We can now use claims data to confirm both the diagnosis of hypertension as well as the blood pressure reading (CPT II codes).
- If you submit a claim using CPT II codes to document the blood pressure reading, we can now use that information, eliminating the need to request the medical record from you.
- Compliant BP is defined as <140/90 mm Hg for all members.
- Blood pressure readings taken from remote monitoring devices that are *electronically submitted directly to the Provider* can be utilized for the measure.

What do we need from you?

We need the last 2 office visit notes from 2018 with the blood pressure documented. Also, if the member was diagnosed with end stage renal disease, renal dialysis, renal transplant or

pregnancy in 2018 please send that documentation as well.

Common chart deficiencies:

- Recheck elevated blood pressures readings and document all BP readings in the medical record.

For more information on HEDIS visit the Anthem Provider Portal online at **Anthem.com**. Click on **Providers** > Click **Polices and Guidelines** > Select your **State**>Scroll down and click **View Med Policies and UM Guideline** >Click **Health & Wellness** > Scroll down to **Quality Improvement and Standards**> and then scroll down on the page to **HEDIS Information**.

Thank you for your continued cooperation and support of HEDIS.

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

Update regarding E/M with modifier 25 - Professional*

Published: Feb 1, 2019 - **Guideline Updates** / Reimbursement Policies

Update regarding E/M with modifier 25: Same day as procedure when a prior E/M for the same or similar service has occurred - Professional

Anthem Blue Cross and Blue Shield (Anthem) has identified that providers often bill a duplicate Evaluation and Management (E/M) service on the same day as a procedure even when the same provider (or a provider with the same specialty within the same group TIN) recently billed a service or procedure which included an E/M for the same or similar diagnosis. The use of modifier 25 to support separate payment of this duplicate service is not consistent with correct coding or Anthem's policy on use of modifier 25.

Beginning with claims processed on or after March 1, 2019, Anthem may deny the E/M service with a modifier 25 billed on the day of a related procedure when there is a recent

service or procedure for the same or similar diagnosis on record.

If you believe a claim should be reprocessed because there are medical records for related visits that demonstrate an unrelated, significant, and separately identifiable E/M service, please submit those medical records for consideration.

URL: <https://providernews.anthem.com/missouri/article/update-regarding-em-with-modifier-25-professional>

Medical Policy and Clinical Guidelines: February 2019*

Published: Feb 1, 2019 - **Policy Updates** / Medical Policy & Clinical Guidelines

Pre-Service/Prior Authorization Clinical Review Update: February 2019*

Published: Feb 1, 2019 - **Policy Updates** / Medical Policy & Clinical Guidelines

Effective with dates of service on or after May 1, 2019, Anthem Blue Cross and Blue Shield will require review of the below 2 Clinical Guidelines for medical necessity. Medical necessity review will require preauthorization. Ordering and servicing providers may submit prior authorization requests by contacting the phone number on the back of the members ID card.

Clinical Guideline Name	Description
CG-SURG-49: Endovascular Techniques (Percutaneous or Open Exposure) for	

<p>Arterial Revascularization of the Lower Extremities</p>	<p>This document addresses the use of peripheral vascular angioplasty, with and without stenting, and with or without atherectomy, for the treatment of occlusive peripheral <i>arterial</i> disease (PAD) of the lower extremities.</p>
<p>CG-SURG-55: Intracardiac Electrophysiological Studies and Catheter Ablation</p>	<p>This document addresses two intracardiac electrophysiological procedures and studies, including electrophysiological studies (EPS) and catheter ablation. EPS with programmed ventricular stimulation (PVS) is used, as a complement to a full workup, to document the inducibility and type of induced arrhythmia, (for example, atrial fibrillation, ventricular tachycardia, etc.); also to assess the risks for recurrent ventricular tachycardia or sudden cardiac death; to evaluate symptoms, such as syncope; and to guide catheter ablation procedures in selected individuals when arrhythmias are suspected to be the etiology. EPS is also used, in appropriate individuals, for the purpose of assessment for eligibility for treatments, such as implantable cardioverter defibrillator therapy.</p> <p>Transcatheter or intracardiac catheter ablation is a treatment option for individuals with certain types of arrhythmias and is performed following imaging and electro-anatomic mapping, which is done during EPS to identify the specific location of the ectopic excitable foci. Catheter ablation utilizes radiofrequency or cryoablation energy to eradicate or ablate the arrhythmogenic foci in the heart which is the source of the arrhythmia. In this way, catheter ablation</p>

reduces or prevents recurrent episodes of certain supraventricular and ventricular arrhythmias that have demonstrated therapeutic response to this treatment modality in clinical practice.

Anthem's Medical Policies and Clinical UM Guidelines are available online on Anthem's website at Anthem.com. Select **Providers** > Select your **State** > Select **Review Policies** > Select **View Policies and Guidelines** > Select **Medical Policies and Clinical UM Guidelines** (for Local Plan members).

Update to AIM Musculoskeletal Program Clinical Appropriateness Guidelines*

Published: Feb 1, 2019 - **Policy Updates** / Medical Policy & Clinical Guidelines

Effective for dates of service on and after May 18, 2019, the following updates will apply to the AIM Specialty Health Musculoskeletal Program Clinical Appropriateness Guidelines.

Spine Surgery – Enhancements as indicated by section below:

- General Requirements
 - Reporting of symptom severity: expanded to include IADLs as functional impairment
 - Tobacco Cessation: removed nicotine-free documentation requirement
- Cervical Decompression with or without Fusion
 - Added exclusion of cervical/thoracic laminectomy if criteria not met
- Lumbar Discectomy, Foraminotomy, and Laminotomy
 - Added criteria to define radicular pain for Lumbar herniated intervertebral disc
- Lumbar Fusion and Treatment of Spinal Deformity (including scoliosis and Kyphosis)

- Added indication and criteria for Flat back Deformity
- Added criteria for Isthmic spondylolisthesis
- Added indication and criteria for Scheuermann's Kyphosis
- Lumbar Laminectomy
 - Added exclusion of lumbar laminectomy if criteria not met
- Noninvasive Electrical Bone Growth Stimulation
 - Added risk factor criteria for cervical non-invasive bone growth stimulation

Interventional Pain Guidelines – Enhancements as indicated by section below:

- General Requirements
 - Reporting of symptom severity: expanded to include IADLs as functional impairment
- Therapeutic Epidural Steroid Injection
 - Updated time period of initial advanced imaging
 - Definition and frequency of repeat therapeutic epidural steroid injection
 - Updated maximum number of annual injections
 - Added criteria for subsequent injection after suboptimal initial response
- Paravertebral Facet Injection/Nerve Block/Neurolysis
 - Updated injection frequency limitations
- Diagnostic Intraarticular Sacroiliac Joint Injections
 - Updated pain reduction from initial injection
- Spinal Cord Stimulators
 - Added criteria for revision/removal of spinal cord stimulator
 - Separated criteria of trial stimulation and permanent stimulator implantation

- Added exclusion of dorsal root ganglion stimulation

As a reminder, ordering and servicing providers may submit prior authorization requests to AIM in one of several ways:

- Access AIM's **ProviderPortal**SM directly at providerportal.com. Online access is available 24/7 to process orders in real-time, and is the fastest and most convenient way to request authorization.
- Access AIM via the Availity Web Portal at availity.com
- Call the AIM Contact Center toll-free number: Central: 800-554-0580, Monday – Friday, 8:30 a.m. – 7:00 p.m. ET.

Please note, this program does not apply to FEP or National Accounts.

For questions related to guidelines, please contact AIM via email at aim.guidelines@aimspecialtyhealth.com. Additionally, you may access and download [a copy of the current guidelines here](#).

Reimbursement Policy Updates: February 2019*

Published: Feb 1, 2019 - **Policy Updates** / Reimbursement Policies

Body Mass Index (BMI) – Facility

Beginning with dates of service on or after May 1, 2019, Anthem Blue Cross and Blue Shield (Anthem) is updating the facility Body Mass Index (BMI) Reimbursement Policy. Reimbursement will be based on a review of all comorbidities, diagnosis codes reported, and the facility specific reimbursement methodology for Body Mass Index (BMI) diagnosis

codes reported as a secondary clinical condition along with other criteria set forth in our policy.

For additional information, please review our updated policy dated May 1, 2019 by visiting the Facilities Reimbursement Policy page for your state on anthem.com/provider.

[Indiana Reimbursement Policies-Facility](#); [Kentucky Reimbursement Policies-Facility](#); [Missouri Reimbursement Policies-Facility](#); [Ohio Reimbursement Policies-Facility](#); [Wisconsin Reimbursement Policies-Facility](#)

Reminder: Review ICD-10-CM Coding Guidelines – Professional

To help ensure the accurate processing of submitted claims, keep in mind ICD-10-CM Coding Guidelines when selecting the most appropriate diagnosis for patient encounters. Remember ICD-10-CM has two different types of excludes notes and each type has a different definition. In particular, one of the unique attributes of the ICD-10 code set and coding conventions is the concept of Excludes 1 Notes. An Excludes 1 Note is used to indicate when two conditions cannot occur together (Congenital form versus an acquired form of the same condition). An Excludes 1 Note indicates that the excluded code identified in the note should not be used at the same time as the code or code range listed above the Excludes 1 Note. These notes are located under the applicable section heading or specific ICD-10-CM code to which the note is applicable. When the note is located following a section heading, then the note applies to all codes in the section.

Reimbursement Policy Update: Injectable Substances with Related Injection Services - Professional*

Published: Feb 1, 2019 - **Policy Updates** / Reimbursement Policies

Beginning with dates of service on or after May 1, 2019, Anthem Blue Cross and Blue Shield (Anthem) is updating our Injectable Substances with Related Injection Services reimbursement policy. The update will reflect that when a claim for an injection service is submitted without the applicable Healthcare Common Procedure Coding System (HCPCS

Level II) drug or injectable substance code for the injected drug or substance, the code for the injection service will not be eligible for reimbursement.

Additionally, when submitting a claim for an aspiration service, with or without an injection, be sure to include code J3590 (*unclassified biologics*) with a zero charge to indicate the biologic contents of the syringe after aspiration, or the service will not be eligible for reimbursement.

For additional information, review our updated policy dated May 1, 2019 by visiting the Professional Reimbursement Policy page for your state at anthem.com/provider.

HEDIS 2019 Federal Employee Program® medical record request requirements

Published: Feb 1, 2019 - **State & Federal** / Federal Employee Plan (FEP)

Centauri Health Solutions is the contracted vendor to gather member medical records on behalf of the Blue Cross and Blue Shield Federal Employee Program. We value the relationship with our providers, and ask that you respond to the requests in support of risk adjustment, HEDIS and other government required activities within the requested timeframe. Centauri Health will work with you to obtain records via fax, mail, remote electronic medical record (EMR) access, or onsite scanning/EMR download (as necessary). We ask that you please promptly comply within **five (5) business days** of the record requests. If you have any questions, please contact Catherine Carmichael with Blue Cross Blue Shield Federal Employee Program at (202) 942-1173 or Carol Oravec with Centauri at (440) 793-7727.

Reminder: Anthem follows Original Medicare policies

Published: Feb 1, 2019 - **State & Federal** / Medicare

Anthem Blue Cross and Blue Shield (Anthem) is required to follow all clinical and reimbursement policies established by Original Medicare in the processing of claims and determining benefits. Anthem follows all Original Medicare local coverage determinations, national coverage determinations, Medicare rulings, code editing logic and the *Social Security Act*.

Anthem *may* offer additional benefits that are not covered under Original Medicare. Certain benefits are only covered when provided by a vendor selected by Anthem. More information can be found at anthem.com/medicareprovider. You may also contact Provider Services at the phone number on the back of the member ID card.

Use grouped CPT codes for AIM Specialty Health authorizations

Published: Feb 1, 2019 - **State & Federal** / Medicare

AIM Specialty Health[®] groups CPT codes on authorizations so they can be reviewed together to support a procedure or therapy. Grouped codes are used for radiology, cardiology, and sleep and radiation therapy programs. The groupings can be found at <http://aimspecialtyhealth.com/ClinicalGuidelines.html> by selecting the appropriate solution and then the exam or therapy being performed. Additional information is available at anthem.com/medicareprovider under *Important Medicare Advantage Updates*.

Anthem eye refraction and routine eye exam billing information

Published: Feb 1, 2019 - **State & Federal** / Medicare

Refractions and routine eye exams are **not** covered under medical insurance for Anthem

members. These benefits may be available through the member's supplemental insurance. These services must be billed to the supplemental vendor. Check your patient's Anthem ID card for the name of the vendor.

Additional information, including billing modifiers and documentation requirements, will be available at [anthem.com/medicareprovider](https://www.anthem.com/medicareprovider) under *Important Medicare Advantage Updates*.
