Anthem Blue Cross and Blue Shield is the trade name of: In Colorado Rocky Mountain Hospital and Medical Service, Inc. HMO products underwritten by HMO Colorado, Inc. In Connecticut: Anthem Health Plans, Inc. In Georgia: Blue Cross Blue Shield Healthcare Plan of Georgia, Inc. In Indiana: Anthem Insurance Companies, Inc. In Kentucky: Anthem Health Plans of Kentucky, Inc. In Maine: Anthem Health Plans of Maine, Inc. In Missouri (excluding 30 counties in the Kansas City area): RightCHOICE® Managed Care, Inc. (RIT), Healthy Alliance® Life Insurance Company (HALIC), and HMO Missouri, Inc. RIT and certain affiliates administer non-HMO benefits underwritten by HALIC and HMO benefits underwritten by HMO Missouri, Inc. RIT and certain affiliates only provide administrative services for self-funded plans and do not underwrite benefits. In Nevada: Rocky Mountain Hospital and Medical Service, Inc. HMO products underwritten by HMO Colorado, Inc. dba HMO Nevada. In New Hampshire: Anthem Health Plans of New Hampshire, Inc. HMO plans are administered by Anthem Health Plans of New Hampshire, Inc. and underwritten by Matthew Thornton Health Plan, Inc. In Ohio: Community Insurance Company. In Virginia: Anthem Health Plans of Virginia, Inc. trades as Anthem Blue Cross and Blue Shield in Virginia, and its service area is all of Virginia except for the City of Fairfax, the Town of Vienna, and the area east of State Route 123. In Wisconsin: Blue Cross Blue Shield of Wisconsin (BCBSWI), which underwrites or administers the PPO and indemnity policies and underwrites the out of network benefits in POS policies offered by Compcare or WCIC; Compcare Health Services Insurance Corporation (Compcare) underwrites or administers the HMO policies and Wisconsin Collaborative Insurance Company (WCIC) underwrites or administers Well Priority HMO or POS policies. Independent licensees of the Blue Cross and Blue Shield Association. Anthem is a registered trademark of Anthem Insurance Companies, Inc. The Blue Cross and Blue Shield names and symbols are registered marks of the Blue Cross and Blue Shield Association. Use of the Anthem websites constitutes your agreement with our Terms of Use.

## Looking to earn continuing medical education credits? Register for these on-demand webinars.

Published: Oct 1, 2021 - **Administrative**

If you missed our live continuing medical education (CME) webinars, you can still register for the recorded webinars and earn CME credits. Join our CME webinar series and learn best practices to overcoming barriers in achieving clinical quality goals, attaining better patient outcomes and improving STARs performance.

**Program objectives:**

- Learn strategies to help you and your care team improve your performance across a range of clinical areas.
- Apply the knowledge you gain from the webinars to improve your organization's quality and STARs ratings.

*Attendees will receive one CME credit upon answering required questions at the conclusion of each webinar.*

**REGISTER HERE for our upcoming live and on-demand clinical quality webinars.**

## Clinical appeals

Published: Oct 1, 2021 - **Administrative**

The clinical appeal process is designed to provide an appropriate and timely review when providers disagree with a decision made by Anthem Blue Cross and Blue Shield (Anthem) The procedures also meet requirements of state laws and accreditation agencies. Appeals can be made verbally, in writing, or by using Interactive Care Reviewer through the Availity portal.

Clinical appeals refer to a situation in which an **authorization or claim** for a service was denied as not medically necessary or experimental/investigational. Medical necessity and prior authorization appeals are different than claim payment disputes and should be submitted in accordance with the clinical appeal process.

To learn more about our appeals process in detail, we encourage you to go to the Anthem provider manual, available on our website at anthem.com/provider.

## Are you talking to ALL of your patients about breast cancer screenings?

Published: Oct 1, 2021 - **Administrative**

**African American and Hispanic women have higher risk of death from breast cancer than their White counterparts.[1]**

Race and ethnicity continue to be a factor influencing mammography use according to a National Library of Medicine.[2] While research and studies show that annual screenings greatly reduce breast cancer deaths, 35% of women still do not get an annual mammogram and the percentage is even higher in African American and Hispanic women.

While African American and White women get breast cancer at about the same rate, African American women have a higher rate of death from breast cancer, according to the Centers for Disease Control and Prevention. African American and Hispanic women are 20% more likely to be diagnosed with advanced stage breast cancer, and they have, respectively, up to 70% and 14% increased risk of death.[4]

A common theme stressed in all of the major breast screening guidelines has been for providers to talk with patients about mammography. But when? Knowing that younger African American and Hispanic women are already considered a “high-risk” group, the conversation can be confusing to your patient under 30.

Help your African American and Hispanic patients understand the importance of early screening by sharing information with them about their unique risks. We’ve included links to videos that address breast cancer screening in both African American and Hispanic women. We hope you will share it with your patients either in your waiting rooms, or by offering to play them during their visits.

Why mammograms matter for Black women.
Why mammograms matter for Hispanic women.

There are other resources available through the Center for Disease control and the American Cancer Society, to name a few. The American College of Radiology has a Talking to Patients about Breast Cancer Screening CME Toolkit that offers CME credits for completing the toolkit.

Talking to women about taking everyday steps to lower their risk for getting breast cancer is the first step in closing disparity gaps in care.

## Federal Price Transparency and Consolidated Appropriations Act phase in new mandates beginning January 1, 2022

Published: Oct 1, 2021 - **Administrative**

In late 2020, the Price Transparency final rule and the Consolidated Appropriations Act (CAA) were enacted. By law, many of these provisions require that Anthem Blue Cross and Blue Shield (Anthem) must disclose pricing and other information previously not available

publicly. Below is a summary of provisions that may impact you. Some sections of these laws are pending further rulemaking/regulations.

**Transparency in pricing regulation – Overview of changes and action Anthem is taking**

Transparency requirements will be phased in over three years beginning July 2022 as follows:

| Plan years that begin | Regulation requirements | Anthem's action |
|---|---|---|
| On or after January 1, 2022 | Anthem must make three separate machine-readable files in a standardized format available to the public, including stakeholders such as consumers, researchers, employers, and third-party developers. The three files must be placed on a publicly available website and updated monthly.<br><br>Negotiated in-network provider rates for all covered items and services.<br>Historical payments to, and billed charges from, out-of-network providers.<br>In-network negotiated rates and historical net prices for all covered prescription drugs administered by Anthem at the pharmacy location level. | |

| | | |
|---|---|---|
| The rate information is required to include the provider's National Provider Identifier (NPI) and taxpayer identification number (TIN). | We are developing the files that will be available through our website for the data we administer and maintain.<br>Machine Readable Files will be published beginning July 1, 2022, except those for prescription drugs, which are pending further rulemaking. | |
| January 1, 2023 | Anthem must make personalized out-of-pocket cost information and the underlying negotiated rates for 500 covered healthcare items and services – including prescription drugs – available to participants, beneficiaries, and enrollees. | As required, we are on track with making information available through an internet-based, self-service tool and in paper form upon request. |
| January 1, 2024 | Anthem must expand our transparency tools to encompass all covered items and services. | We continue to review and assess guidance regarding the regulation and are working to comply with requirements. |

**Consolidated Appropriations Act (CAA)**

As a part of the Consolidated Appropriations Act or CAA, there are significant new health plan requirements, including protections for patients from surprise medical bills and other significant health coverage related provisions. Most of these provisions are effective January 1, 2022.

Regulatory detail needed for full implementation is still pending in most cases. However, the Centers for Medicare & Medicaid Services (CMS) has indicated good faith compliance should be pursued pending regulatory implementation detail.

**Some key provisions of the CAA, effective January 1, 2022, are listed below that may impact your business interactions with us.**

**Surprise billing and independent dispute resolution process**
The CAA requires that patients be held responsible for only in-network cost sharing amounts, including deductibles, in emergency situations and certain non-emergency situations where patients do not have the ability to choose an in-network provider (including air ambulance providers). The provision also prohibits out-of-network providers from balance billing except in limited circumstances where the out-of-network provider has obtained a notice and consent from the patient. An independent dispute resolution (IDR) process is available when an out-of-network provider and Anthem cannot reach an agreement on payment.

In July 2021, an interim final rule (IFR) provided some of the regulatory detail around cost sharing calculations for surprise billing. Further regulatory guidance is expected in the coming months – including guidance regarding the IDR process.

Anthem is moving forward with changes in calculations and payment based on the guidance received to date. We will continue to monitor for additional regulatory guidance.

**Increasing transparency by removing contract provisions known as gag clauses that may prohibit health plans from disclosing price and quality information**
The CAA requires Anthem to provide access to provider-specific price or quality of care information, through a consumer engagement tool or any other means, to referring providers, enrollees, or individuals eligible to become Anthem enrollees.

Due to the gag clause provision, we will no longer be able to allow suppression of price and quality data upon provider request.

**Member identification card changes**

Member ID cards issued for plan years on and after January 1, 2022, must include information to ensure that members know how to access current information regarding their deductibles and out-of-pocket limits.  Additionally, member ID cards must include a telephone number and internet address for members to use for assistance should they have questions such as whether a provider participates in our networks. We encourage in-network providers to continue to use Availity for member cost share information.

**Continuity of care**

As a part of the Consolidated Appropriations Act, there is a continuity of care protection requirement that allows patients with serious or complex care needs (continuing care patients) to have up to a 90-day period of continued coverage at the same terms and conditions when a provider changes network status or an insured group contract terminates. This provides continued coverage at in-network cost sharing rates to allow for a transition of care to an in-network provider or until the patient is no longer a continuing care patient under the CAA.

Anthem must notify individuals who qualify as continuing care patients at the time of the provider's termination as an in-network provider of the option to continue care for the transitional period of up to 90 days.  Providers subject to this provision must accept the continued in-network payment as payment in full and otherwise comply with all policies, procedures and quality standards Anthem imposes.  If an insured group terminates with Anthem, continuing care patients also have up to a 90-day period of continued care at in-network cost sharing rates. Applicable contract rates will apply for providers.

**Protecting patients and improving the accuracy of provider directory information**

Anthem must maintain a provider directory available to consumers online that includes a list of the in-network providers and facilities. Anthem must verify provider/facility name, address, specialty, phone number and digital contact information at least every 90 days.

## Your recommendation is key to encouraging cancer screenings for your female patients

Published: Oct 1, 2021 - **Administrative**

The American Cancer Society estimates there will be approximately 1,898,160 cancer cases diagnosed in 2021. That's the equivalent of 5,200 new cases each and every day. [1] The good news is, patients say they are more likely to get screened when you recommend it. What else can you do to influence cancer screenings?[2]

1. Understand the power of the physician recommendation.

- Your recommendation is the most influential factor in whether a person decides to get screened.
- Patients are 90% more likely to get a screening when they reported a physician recommendation.
- "My doctor did not recommend it," is the primary reason for screening avoidance.

2. Recognize cultural barriers that may impact your diverse patients

- Culturally sensitive conversations with your patients can help with fear, embarrassment, anxiety, and misconceptions about screenings.
- Go to com for information and resources.

3. Measure the screening rates in your practice; it may not be as high as you think.

- Set goals to get screening rates up.
- Follow the HEDIS guidelines included in this article to help accurately track your care gap closures.

4. More screening doesn't have to mean more work for you.

- Reach out to us about available member data – we may be able to help identify or supply access to data for those members who are due screenings.
- Develop a reminder system, which has been demonstrated to be effective, to remind you and staff that patients have screenings due.

5. Help members access benefit information about screenings to eliminate the cost barrier.

- Log onto com and use the Patient Information tab to run an Eligibility and Benefits inquiry.
- Members can access their benefit information by logging onto com, through Live Chat, or by downloading the Sydney Health App.

- Blue Cross Blue Shield Service Benefit Plan members, also known as Federal Employee Program® members, can access their benefit information by logging onto org, or by downloading the fepblue App from the Apple Store or on Google Play.

**Measure up: HEDIS® measure specifications for cancer screenings for women**

**Cervical cancer screening**

Organized and continuous screenings along with removal of precancerous lesions can lead to a 60% decrease in cervical cancer.[3]

Cervical cancer screening is measured by the percentage of women, 21 to 64 years of age who were screened for cervical cancer using either of the following criteria:

- Women 21 to 64 years of age who had cervical cytology performed within the last 3 years.
- Women 30 to 64 years of age who had cervical high-risk human papillomavirus (hrHPV) testing performed within the last 5 years.
- Women 30 to 64 years of age who had cervical cytology/high-risk human papillomavirus (hrHPV) co-testing within the last 5 years.

| Description | CPT/HCPCS Code |
|---|---|

**Breast cancer screening**

More women in the United States are surviving and thriving after breast cancer than ever before. In fact, in the last 30 years, the breast cancer death rate has dropped an astounding 40%. The decreases are believed to be the result of finding breast cancer earlier through screening, increased awareness, and better treatments.[4]

Breast cancer screening is measured by the percentage of women 50 to 74 years of age who had a mammogram to screen for breast cancer. Compliant members have one or more mammograms any time on or between October 1st two years prior to the measurement year and December 31st of the measurement year.

| Description | CPT/HCPCS Code |

**Chlamydia screening in women**

Sexual health is an essential element of overall health and well-being. Many patients want to discuss their sexual health with you, but most of them want you to bring it up. The National Coalition for Sexual Health has published a guide to help physicians feel comfortable about the conversation. Get a copy of the Sexual Health and Your Patients: A Providers Guide by clicking on the title or through this website: ctcfp.org.

Chlamydia screening in women is measured by the percentage of women 16 to 24 years of age who were identified as sexually active and who had at least one test for chlamydia during the measurement year.

| Description | CPT/HCPCS Code |
| --- | --- |
| Chlamydia tests | **CPT:** 87110, 87270, 87320, 87490–87492, 87810 |

# Good news! Non-payment remittance advice enhancements coming soon

Published: Oct 1, 2021 - **Administrative**

In the coming months, we will be enhancing your ability to search, review and download a copy of the remittance advice on Availity when there is no associated payment. For remittance advices with payments, you may continue to search with the check/EFT number.

**What's changing?**

1. Non-payment number display in the Check Number and Check/EFT Number fields:

- **Current** - Today, there are two sets of numbers for the same remittance advice. The paper remittance displays 10 bytes (9999999999 or 99########) and the corresponding 835 (ERA) displays 27 bytes (9999999999 – [year] #############).
- **Enhancement** - The updated numbering sequence for the paper remittance and corresponding 835 (ERA) will contain the same ten-digit number beginning with 9 (9XXXXXXXXX). Each non-payment remittance issued will be assigned a unique number.

1. Searching for non-payment remittance:

- **Current** - When using Remit Inquiry, the search field requires a date range and tax ID to locate a specific remittance due to same number scenario being used for every non-payment remittance.
- **Enhancement** - Once the unique ERA non-payment remittance number is available, it can be entered in the check number field in Remit Inquiry. This new way of assigning check numbers will provide a faster and simplified process to find the specific remittance.

The way your organization receives remittances and payments is not changing; we have simply enhanced the numbering for the non-pay remittances. These changes will not impact previously issued non-payment remittance advices. We'll provide further information before this change is implemented.

## Procedure searches in Find Care

Published: Oct 1, 2021 - **Administrative** / Digital Tools

Find Care, the doctor finder and transparency tool in Anthem Blue Cross and Blue Shield's (Anthem) online directory, allows Anthem members to search and compare cost and quality measures for in-network providers. This tool allows members to sort providers based on distance, name, or personalized match. Additionally, as we informed you earlier this year, the enhanced personalized match sorting option is now available to search by procedure type in addition to providers.

The algorithms used to sort procedure type use a combination of member and provider features to sort and display the results for a member's search. The sorting results take into account member factors such as the member's medical conditions and demographics. Provider factors such as surgeon-facility pairing (an individual provider who performs a procedure at a specific facility), cost efficiency measures, volumes of patients treated across various disease conditions, and outcome-based quality measures.

Combined member and provider features generate a unique ranking of surgeon-facility pairings or facility providers for each member conducting the procedure search. Displayed first are surgeon-facility pairings with the highest overall ranking within the search radius. Remaining pairings are displayed in descending order based on overall rank and proximity to the center of the search radius.

**Personalized match procedure searches is expanding to include additional procedures on or after November 19, 2021. Anthem will use an updated episode of care methodology for these new procedures.** The episode of care methodology for procedure searches that became available earlier this year will remain unchanged. The personalized match methodology for specialty-based provider searches remains unchanged. Members continue to have the ability to sort from a variety of orders such as distance. This enhancement in sorting methodology has no impact on member benefits.

Providers may review a copy of the procedure sorting methodologies, including the updated episode of care methodology for procedures added on or after November 19, 2021, by going to Availity and then using the following navigation:  Go to Availity > Payer Spaces > Anthem > Information Center > Administrative Support > Personalized Provider Procedure Search Methodology for Expanded Set of Procedures.pdf

If you have general questions about the Find Care tool or the change to the quality measures for procedure searches, please call the number on the back of the member's ID card or dial 800-676-BLUE (2583) to speak to a Provider Service representative.

If you would like detailed information about quality or cost factors used as part of this unique sorting or you would like to request reconsideration of those factors, you may do so by emailing personalizedmatchsorting@anthem.com or by calling 833-292-2601.

## REMINDER: EnrollSafe, the new electronic funds transfer enrollment portal for Anthem providers is replacing CAQH Enrollhub effective November 1, 2021

Published: Oct 1, 2021 - **Administrative** / Digital Tools

As a reminder, effective **November 1, 2021**, EnrollSafe will replace CAQH Enrollhub as the electronic funds transfer (EFT) enrollment portal for Anthem Blue Cross and Blue Shield (Anthem) providers. As of November 1, 2021, CAQH Enrollhub will no longer offer EFT enrollment to new users. **CAQH Enrollhub is the only CAQH tool being decommissioned. All other CAQH tools will not be impacted.**

**Benefits of EFT**
Not only is receiving your payment more convenient, so is signing up for EFT. When you sign up for EFT through EnrollSafe, the new enrollment portal, you'll receive your payments up to seven days sooner than through the paper check method. What's more, it's easier to reconcile your direct deposits.

**Secure and available 24-hours a day – EnrollSafe**
Beginning November 1, 2021, log onto the EnrollSafe enrollment hub at enrollsafe.payeehub.org to enroll in EFT. Once you have completed registration, you'll be directed through the EnrollSafe secure portal to the enrollment page, where you'll provide the required information to receive direct payment deposits.

**Already enrolled in EFT through CAQH Enrollhub?**
Please note if you're already enrolled in EFT through CAQH Enrollhub, no action is needed unless making changes. Your EFT enrollment information will not change as a result of the new enrollment hub.

If you have changes to make, after October 31, 2021, use EnrollSafe to update your account.

**Electronic remittance advice (ERA) makes reconciling your EFT payments easy and paper-free**
Now that you are enrolled in EFT, using the digital ERA is the very best way to reconcile your deposits – securely and safely. You'll be issued a trace number with your EFT deposit that matches up with your ERA on Availity.

ERAs can be retrieved directly from Availity. Log onto Availity and select **Claims and Payments** > **Send and Receive EDI Files** > **Received Files** folder. When using a clearinghouse or billing service, they will supply the 835 ERA for you. You also have the option to view or download a copy of the **Remittance Advice** under **Payer Spaces** > **Remittance Inquiry tool**.

## Pharmacy information available on anthem.com

Published: Oct 1, 2021 - **Products & Programs** / Pharmacy

Visit Pharmacy Information for Providers on anthem.com for more information on:

- Copayment/coinsurance requirements and their applicable drug classes
- Drug lists and changes
- Prior authorization criteria

- Procedures for generic substitution
- Therapeutic interchange
- Step therapy or other management methods subject to prescribing decisions
- Any other requirements, restrictions, or limitations that apply to using certain drugs

The commercial and marketplace drug lists are posted to the web site quarterly (the first of the month for January, April, July and October).

To locate “Marketplace Select Formulary” and pharmacy information, scroll down to “Select Drug Lists.” This drug list is also reviewed and updated regularly as needed.

*FEP Pharmacy updates and other pharmacy related information may be accessed* at fepblue.org > Pharmacy Benefits.

## October 2021 specialty pharmacy updates are available (MAC)

Published: Oct 1, 2021 - **Products & Programs** / Pharmacy

*Material adverse change (MAC)*

Specialty pharmacy updates for Anthem Blue Cross and Blue Shield (Anthem) are listed below.

Anthem’s medical specialty drug review team manages prior authorization clinical review of *non-oncology* use of specialty pharmacy drugs. AIM Specialty Health® (AIM), a separate company, manages review of specialty pharmacy drugs for oncology use.

Please note that inclusion of National Drug Code (NDC) code on your claim will help expedite claim processing of drugs billed with a Not Otherwise Classified (NOC) code.

**Site of care updates**

**Effective for dates of service on and after January 1, 2022**, the following specialty pharmacy codes from current or new clinical criteria documents will be included in our site of care review process.

Access our Clinical Criteria to view the complete information for the following site of care updates.

| Clinical Criteria | HCPCS or CPT Code(s) | Drug |
|---|---|---|
| *ING-CC-0062 | Q5121 | Avsola |
| *ING-CC-0081 | J0584 | Crysvita |
| *ING-CC-0162 | J3241 | Tepezza |

***** Non-oncology use is managed by the medical specialty drug review team.

**Quantity limit updates**

**Effective for dates of service on and after January 1, 2022**, the following specialty pharmacy codes from current or new clinical criteria documents will be included in our quantity limit review process.

Access our Clinical Criteria to view the complete information for these quantity limit updates.

| Clinical Criteria | Drug | HCPCS or CPT Code(s) |

## Clarification: Anthem’s enhanced claim edits for outpatient facility claims

Published: Oct 1, 2021 - **Policy Updates** / Reimbursement Policies

In the June 2021 edition of *Provider News*, we announced additional enhancements to our claims editing systems to include an automated front-end adjudication of claims edits.

To clarify, this enhancement *does not affect* any of our reimbursement policies. The enhanced edits update our claims editing process for outpatient facility claims.

These enhanced edits provide an opportunity to shift certain existing back-end reviews to front-end adjudication for outpatient facility claims including but not limited to scenarios with:

- Revenue code billing
- CPT/HCPCS code reporting
- Modifier usage

---

## Reimbursement policy clarification: Claims Requiring Additional Documentation (facility)

Published: Oct 1, 2021 - **Policy Updates** / Reimbursement Policies

In the May 2021 issue of *Provider News*, we communicated the thresholds for the itemized bill requirement for claims reimbursed at a percent of charge:

- The threshold for requiring an itemized bill for inpatient claims is $100,000.
- The threshold for requiring an itemized bill for outpatient claims is $50,000.

We subsequently communicated in the August 2021 *Provider News* that the wording of the policy was updated to remove the threshold language from the policy; however, the removal of the language from the policy DOES NOT change the thresholds in place. The communicated thresholds remain at $100,000 for inpatient and $50,000 for outpatient. We will communicate any future changes in thresholds via *Provider News.*

## Sexually Transmitted Infections Testing (Professional)

Published: Oct 1, 2021 - **State & Federal** / Medicare

Medicare Advantage

*(Effective 01/01/22)*
Anthem Blue Cross and Blue Shield (Anthem) allows reimbursement of sexually transmitted infection (STI) tests unless provider, state, federal, or CMS contracts and/or requirements indicate otherwise. We consider certain STI testing CPT® codes to be part of a laboratory panel grouping. When Anthem receives a claim with two or more single tests laboratory procedure codes reported, we will bundle those two or more single tests into the comprehensive laboratory procedure code listed below.

Applicable single STI CPT codes:

- 87491: Infectious agent detection by nucleic acid (DNA or RNA); chlamydia trachomatis, amplified probe technique
- 87591: Infectious agent detection by nucleic acid (DNA or RNA); neisseria gonorrhoeae, amplified probe technique
- 87661: Infectious agent detection by nucleic acid (DNA or RNA); trichomonas vaginalis, amplified probe technique

Applicable comprehensive code:

- 87801: Infectious agent detection by nucleic acid (DNA or RNA), multiple organisms; amplified probe(s) technique

Anthem will reimburse the more comprehensive, multiple organism code for infectious agent detection by nucleic acid, amplified probe technique (CPT code 87801), when two or more single test CPT codes are billed separately by the same provider on the same date of service. Reimbursement will be made based on a single unit of CPT code 87801 regardless of the units billed for a single code. No modifiers will override the edit.

For additional information, please review the Sexually Transmitted Infections Testing — Professional reimbursement policy at anthem.com/medicareprovider.

## Information about 2021 Special Needs Plans

Published: Oct 1, 2021 - **State & Federal** / Medicare

*Medicare Advantage*

Anthem Blue Cross and Blue Shield (Anthem) is offering Special Needs Plans (SNPs) to people eligible for both Medicare and Medicaid benefits or who are qualified Medicare Advantage beneficiaries. Some SNPs provide enhanced benefits to people eligible for both Medicare and Medicaid, which include supplemental benefits such as hearing, dental, vision, and transportation to medical appointments. Some SNP plans include a card or catalog for purchasing over-the-counter items, but SNPs do not charge premiums.

SNP members benefit from a model of care (MOC) that is used by Anthem to assess needs and coordinate care. Each member receives a comprehensive health risk assessment (HRA) within 90 days of enrollment and annually thereafter, which covers physical, behavioral, and functional needs, along with a comprehensive medication review. The HRA is then used to create a member care plan. Members with multiple or complex conditions are assigned a health plan case manager.

SNP HRAs, care plans, and case managers support members and their providers by helping identify and escalate potential problems for early intervention, ensuring appropriate and timely follow-up appointments plus providing navigation and coordination of services across the Medicare and Medicaid programs.

**Provider training required**

Providers contracted for SNP plans are required to complete an annual training to keep up-to-date with plan benefits and requirements, including details on coordination of care and MOC elements. Every provider contracted for SNP is required to complete an attestation stating they have completed their annual training. These attestations are located at the end of the self-paced training document.

To take the self-paced training, please go to the MOC Provider Training link at availity.com.

**How to access the *Custom Learning Center* on the Availity Portal:***

1. Log in to the Availity Portal at availity.com.

    1. At the top of the Availity Portal, select **Payer Spaces** and select the appropriate payer.

2. On the *Payer Spaces* landing page, select **Access Your Custom Learning Center** from *Applications*.
3. In the *Custom Learning Center*, select **Required Training**.
4. Select **Special Needs Plan and Model of Care Overview**.
5. Select **Enroll**.
6. Select **Start**.
7. Once the course is completed, select **Attestation** and complete.

**Not registered for the Availity Portal?**
Have your organization's designated administrator register your organization for the Availity Portal.

1. Visit availity.com to register.
2. Select **Register**.
3. Select your organization type.
4. In the *Registration* wizard, follow the prompts to complete the registration for your organization.

**FAQs**

**What does it mean to be dual-eligible? What is a D-SNP?**

The term *dual-eligible* refers to people with Medicare coverage who also qualify for some type of state Medicaid benefit — meaning that these members are eligible for both Medicaid and Medicare. These individuals may have higher incidence of chronic conditions, cognitive impairments, and functional limitations. D-SNPs are special Medicare Advantage plans that enroll only dual-eligible people, providing them with more intensive coordination of care and services than those offered by traditional Medicare and Medicare Advantage plans.

**What is a SNP Model of Care?**

The Centers for Medicare & Medicaid Services (CMS) requires Special Needs Plans (SNPs) to have a model of care (MOC) that describes how the SNP will administer key components of care management programs, including assessments and training. The MOC describes the unique needs of the population being served and how Anthem Blue Cross and Blue Shield (Anthem) will meet those needs. Each SNP MOC is evaluated and scored by the NCQA and approved by CMS.

**How does the MOC help physicians?**

The three major components of the MOC — 1) the health risk assessment (HRA), 2) *Care Plan,* and 3) case manager — support providers in serving D-SNP members. Each member receives a comprehensive HRA that covers physical, behavioral, and functional needs, along with a comprehensive medication review. Anthem staff use the HRA information to create a *Care Plan*. Members with multiple or complex conditions may be assigned to a case manager.

These key MOC components identify and escalate potential problems for early intervention, ensure appropriate and timely follow-up, and help coordinate services across Medicare and Medicaid programs. Through the provider website, providers have access to review the *Care Plan*, the results of the HRA, and other information to help manage care.

**How are transitions of care managed?**

Anthem case managers are involved in transitions of care (for example, discharge from hospital to home for those at high-risk of readmission). Such transitions may trigger a reassessment and updates to the member's *Care Plan* as needed. Following a discharge, case managers help ensure that D-SNP members see their PCP within a week and work through barriers that members experience in adhering to post discharge medication regimens.

**Who makes up the Interdisciplinary Care Team (ICT)?**

Members of the ICT include any of the following: nurses, physicians, social workers, pharmacists, the member and/or the member's caregiver, behavioral health specialists, or other participants as determined by the member, the member's caregiver, or a relative of the member.

Providers who care for Anthem members are considered participants in the ICT and may be contacted by a case manager to discuss the member's needs. The case manager may present recommendations concerning care coordination or other needs. The goal of the ICT is to assist providers in managing and coordinating patient care.

**Do I have to become a Medicaid provider?**
You are not required to become a Medicaid provider, but we recommend that you do. Even if you are only providing services covered by Medicare Part A or Part B to SNP members, we recommend that you attain a Medicaid ID because the state Medicaid agency may require this for the Medicare cost share.

**How do I file claims for SNP members?**
Claims for services to SNP members are filed the same way claims are filed for Anthem members enrolled in Medicare Advantage who are not part of SNP. Providers should ensure that the claim has the correct member ID (including the prefix).

**How is the SNP member's cost-sharing handled?**
SNP benefits are administered similarly to Medicare fee-for-service benefits. Upon receiving the *Explanation of Payment (EOP)* from Anthem, you should bill the state Medicaid agency or the applicable Medicaid managed care organization (MCO) contracted with the state for processing of any Medicare cost-sharing applied.

Medicare cost-sharing is paid according to each state's Medicaid reimbursement logic. Some states do not reimburse for Medicare cost sharing if the payment has already met or exceeded Medicaid reimbursement methodology.

**Do I have to file claims twice for SNP members?**
Yes, when you treat Anthem members enrolled in a SNP, you will file the initial claim with Anthem and then bill the state Medicaid agency or the applicable Medicaid MCO contracted with the state for Medicare cost sharing processing. Please use the same electronic claim submission or address you currently use for Anthem claims filing.

**Do SNP members have access to the same prescription drug formulary as other Anthem members enrolled in Medicare Advantage?**

Yes, SNP members have coverage for the same prescription drugs listed on the Anthem prescription drug formulary for Medicare Advantage.

Please note that in California, the tier placement may vary. Be sure to review the plan's specific formulary for details on California SNPs, as the formulary depends on the market.

**What are SNP benefits for Anthem members?**
The SNP for Anthem members covers all Medicare Part A and Part B services and includes full Part D prescription coverage. Anthem also covers a range of preventive services with no-cost sharing for the member. In addition, the SNP includes coverage for supplemental benefits that may include routine dental, vision, and nonemergency medical transportation. A summary of the SNP benefits is posted on the provider website for Anthem members.

Any Medicaid benefits available to the member will be processed under their Medicaid coverage directly with the state or the Medicaid organization in which the member is enrolled.

**Does the SNP use the same procedure codes and electronic data interchange (EDI) payer codes?**
Yes, the SNP uses the same procedure and payer codes and electronic filing procedures as other Medicare Advantage plans through Anthem.

**Is the EDI payer ID for this product the same as others?**
Yes, all the claim submission information will be the same (this applies to EDI and paper). Providers must submit this information with the correct ID. Please check the EDI section of the provider website for the correct payer codes to use for your market.

## HEDIS® medical record submission made easier with our Remote EMR Access Service

Published: Oct 1, 2021 - **State & Federal** / Medicare

*Medicare Advantage*

Instead of faxing multiple pages of medical records for HEDIS® studies, use Anthem Blue Cross and Blue Shield (Anthem)'s Remote EMR Access Service we offer to providers that allows us to access your EMR system directly to pull the documentation we need. Our Remote EMR Access Service helps reduce the time and costs associated with medical record retrieval while improving efficiency and lessening the impact on your office staff.

We have a centralized EMR team experienced with multiple EMR systems and extensively trained annually on HIPAA, EMR systems, and HEDIS® measure updates. We complete medical record retrieval based on minimum necessary guidelines:

- We only access medical records of members pulled into the HEDIS® sample using specific demographic data.
- We only retrieve the medical records that have evidence related to the HEDIS® measures.
- We only view face sheets when there are demographic discrepancies.
- We exclude data related to hospice, long-term care, inpatient, and palliative care.

**Let us help you! Getting started with Remote EMR Access is just one click away.** Download and complete this registration form and email it to us at Centralized_EMR_Team@anthem.com.

**To learn more about our Remote EMR Access Service, view the Frequently Asked Questions below.**

**How do you retrieve our medical records?**

We access your EMR using a secure portal and retrieve only the necessary documentation by printing to an electronic file we store internally, on our secure network drives.

**Is printing necessary?**

Yes. The NCQA audit requires print-to-file access.

**Is this process secure?**

Yes. We only use secure internal resources to access your EMR systems. All retrieved records are stored on Anthem secure network drives.

**Why does Anthem need full access to the entire medical record?**

There are several reasons we need to look at the entire medical record of a member:

- HEDIS® measures can include up to a 10-year look back at a member's information.
- Medical record data for HEDIS® compliance may come from several different areas of the EMR system, including labs, radiology, surgeries, inpatient stays, outpatient visits, and case management.
- Compliant data may be documented or housed in a non-standard format, such as an in-office lab slip scanned into miscellaneous documents

**What information do I need to submit to use your Remote EMR Access Service?**
Complete the registration form that requests the following information:

- Practice/facility demographic information (e.g., address, National Provider ID, taxpayer identification numbers, etc.)
- EMR system information (e.g., type of EMR system, required access forms, access type – web based or VPN-to-VPN connection, special requirements needed for access, etc.)
- List of current providers/locations or a website for accessing this list. Also, if applicable, a list of providers affiliated with the group that are not in the EMR System.

HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

## New Medical Step Therapy requirements

Published: Oct 1, 2021 - **State & Federal** / Medicare

*Medicare Advantage*

Effective November 1, 2021, the *Clinical Criteria* ING-CC-0005 will include a trial and inadequate response or intolerance to two preferred hyaluronan agents in the Part B medical step therapy precertification review. Step therapy review will apply upon precertification initiation, in addition to the current medical necessity review (as-is current procedure). Step therapy will not apply for members who are actively receiving non-preferred medications listed below.

*Clinical Criteria* are publicly available on the provider website. Visit the Clinical Criteria page to search for specific criteria.

| ***Clinical Criteria*** | **Preferred drug(s)** | **Nonpreferred drug(s)** |
|---|---|---|
| **ING-CC-0005** | Euflexxa (J7323)<br>Supartz FX (J7321)<br>Durolane (J7318)<br>Gelsyn-3 (J7328) | Including but not limited to:<br>Gel-One (J7326)<br>GenVisc 850 (J7320)<br>Hymovis (J7322)<br>Monovisc (J7327)<br>Orthovisc (J7324)<br>Synvisc/Synvisc One (J7325)<br>TriVisc (J7329)<br>Hyalgan/Visco-3 (J7321)<br>Triluron (J7332) |

## Drug fee schedule update

Published: Oct 1, 2021 - **Administrative**

Routinely, the Centers for Medicare & Medicaid Services (CMS) issue revisions to the average sales price (ASP) fee schedules regarding drug pricing. To that end, CMS is supplying the fourth quarter fee schedule with an effective date of October 1, 2021. This will go into effect with Anthem Blue Cross and Blue Shield (Anthem) on **November 1, 2021**. To view the ASP fee schedule, please visit the CMS website at:

https://www.cms.gov/medicare/medicare-fee-for-service-part-b-drugs/mcrpartbdrugavgsalespricecms.gov/medicare/medicare-fee-for-service-part-b-drugs/mcrpartbdrugavgsalesprice.

## Guided Access HMO plans overview

Published: Oct 1, 2021 - **Administrative**

As a reminder, Anthem Blue Cross and Blue Shield and our subsidiary company, HMO Nevada (Anthem) have products called Guided Access HMO. We would like to share information regarding these plans to help ensure our providers have as much information as possible to assist in servicing members with one of these plans.

Guided Access HMO plans may be accessing a different network depending on the Health Benefit plan option.

- *Large Group/Small Group* members will utilize the **HMO Nevada** network
- *Individual Exchange* members will utilize the **Pathway X HMO** network

**Referral requirements**

Guided Access HMO plans both require a Primary Medical Group selection and Primary Care Physician (PCP) referral to specialists.  Submit referral requests should through Availity via the Interactive Care Reviewer (ICR) online referral tool.

**Sample Guided Access HMO ID card**

*Please note the ID cards below are just samples, and do not include actual member information such as copays. That information will be included when the ID cards are generated and sent to members prior to the effective date*

**Summary of Information**

**Additional Details:**
Contact your local Anthem network consultant for **additional details** regarding:

- Operational Procedures
- Referrals for Guided Access HMO
- Submit a Referral via Interactive Care Reviewer (ICR).

## New reimbursement policy: Multiple and Bilateral Surgery Processing (facility) (MAC)

Published: Oct 1, 2021 - **Policy Updates** / Reimbursement Policies

*Material adverse change (MAC)*

Beginning with dates of service on or after February 1, 2022, Anthem Blue Cross and Blue Shield (Anthem) will implement a new facility reimbursement policy titled, Multiple and Bilateral Surgery Processing.

Anthem allows reimbursement for only the primary, or highest valued, procedure when multiple or bilateral procedures are performed on the same day or same session, and at the same place of treatment when billed by a facility. A single surgical procedure is subject to multiple procedure reduction guidelines when submitted with multiple units.

For more information about this policy, visit the Anthem reimbursement policy page at anthem.com/provider.

# Medical policy and clinical UM guidelines notification (MAC)

Published: Oct 1, 2021 - **Policy Updates** / Medical Policy & Clinical Guidelines

*Material adverse change (MAC)*

Anthem Blue Cross and Blue Shield and our subsidiary company, HMO Nevada (Anthem) are pleased to provide you with our updated and new medical policies. Anthem will also be implementing changes to our Clinical Utilization Management (UM) Guidelines that are adopted for Nevada. The Clinical UM guidelines published on our website represent the clinical UM guidelines currently available to all Plans for adoption throughout our organization. Because local practice patterns, claims systems and benefit designs vary, a local Plan may choose whether or not to implement a particular clinical UM guideline. The link below can be used to confirm whether or not the local Plan has adopted the clinical UM guideline(s) in question. Adoption lists are created and maintained solely by each local Plan.

The major new policies and changes are summarized below. Please refer to the specific policy for coding, language, and rationale updates and changes that are not summarized below.

**New Medical Policies and effective for service dates on and after January 1, 2022:**

- **00057 Gene Expression Profiling for Idiopathic Pulmonary Fibrosis:** This document addresses the use of gene expression profiling to assist in the diagnosis or management of idiopathic pulmonary fibrosis
- The use of gene expression profiling to assist in the diagnosis or management of idiopathic pulmonary fibrosis is considered investigational and not medically necessary in all situations.

- **00041 Machine Learning Derived Probability Score for Rapid Kidney Function Decline:** This document addresses the use of artificial intelligence-enabled algorithms which may combine a variety a clinical characteristics such as, biomarkers, genetics, gender or race, to generate prognostic information to enable a more personalized approach to the treatment of chronic kidney disease (e.g., KidneyIntelX).
- Use of artificial intelligence-enabled algorithms (e.g., KidneyIntelX) to predict progressive kidney function decline in chronic kidney disease is considered investigational and not medically necessary for all indications.

- **00137 Eye Movement Analysis Using Non-spatial Calibration for the Diagnosis of Concussion:** This document addresses the use of The EyeBOX, the first baseline-free, temporal calibration eye movement analysis device to assist physicians in objectively evaluating individuals with suspected concussion.
- Eye movement analysis using non-spatial calibration is considered investigational and not medically necessary for the diagnosis of concussion.

**Revised Medical Policies and Adopted Clinical UM Guidelines effective January 1, 2022**:

- **CG-MED-70 Wireless Capsule Endoscopy for Gastrointestinal Imaging and the Patency Capsule:** This document addresses the use of wireless capsule endoscopy (WCE or video capsule endoscopy [VCE]) devices which have been developed for imaging portions of the gastrointestinal tract and the patency capsule which is intended to ensure that there are no strictures in the digestive tract to impede passage of the wireless endoscopy capsule.
- Added the use of a magnetically controlled wireless capsule as Not Medically Necessary
- Reformatted Not Medically Necessary statement

- **00004 Technologies for the Evaluation of Skin Lesions (including Dermatoscopy, Epiluminescence Microscopy, Videomicroscopy, Ultrasonography:** This document addresses the use of photographic, optical, video, and other imaging technologies for the evaluation of skin lesions.

- Added electrical impedance spectroscopy for the evaluation of skin lesions as Investigational and Not Medically Necessary

- **00025 Laboratory Testing as an Aid in the Diagnosis of Heart Transplant Rejection:** This document addresses specific noninvasive laboratory tests for the early detection of rejection following a heart transplant.
- Added noninvasive tests for detection of heart transplant rejection as Investigational and Not Medically Necessary including, but not limited to, AlloSure Heart, AlloSeq cell-free DNA, MMDx Heart, and myTAIHeart

**Medical Policies and Clinical Guideline archived July 7, 2021 except where noted**

- CG-MED-75 Medical and Other Non-Behavioral Health Related Treatments for Autism Spectrum Disorders and Rett Syndrome
- 00009 Vacuum Assisted Wound Therapy in the Outpatient Setting
- 00034 Standing Frames
- 00042 Genetic Testing for Cerebral Autosomal Dominant Arteriopathy with Subcortical Infarcts and Leukoencephalopathy Syndrome
- 00046 Prothrombin (Factor II) Genetic Testing
- 00001 Computed Tomography to Detect Coronary Artery Calcification
- 00127 Sacroiliac Joint Fusion (effective September 12, 2021)

**MCG Updates effective August 19, 2021**

- W0118 Musculoskeletal Surgery or Procedure GRG
- For open sacroiliac joint fusion, see CG-SURG-111 Open Sacroiliac Joint Fusion

- “Relapse of symptoms after remission” changed to “Relapse of symptoms after virtual absence of depressive symptoms”
- Updated footnote with timeframe for Remission, Relapse, and Recovery statements

Anthem Medical Policies and Clinical UM Guidelines are developed by our national Medical Policy and Technology Assessment Committee. The Committee, which includes Anthem medical directors and representatives from practicing physician groups, meets quarterly to review current scientific data and clinical developments.

All coverage written or administered by Anthem excludes from coverage, services or supplies that are investigational and/or not medically necessary. A member’s claim may not be eligible for payment if it was determined not to meet medical necessity criteria set in Anthem’s medical policies. Review procedures have been refined to facilitate claim investigation.

**Anthem’s Medical Policies and Clinical UM Guidelines are available online:**
The complete list of our Medical Policies and Clinical UM Guidelines may be accessed on Anthem’s Web site at anthem.com/provider**.** Under the *Provider Resources* heading, select Policies and Guidelines. Select **Nevada** as Your State. Select View Medical Policies & UM Guidelines. Either enter key word or code, or select the link for Full List page to search the policy for your inquiry.

Open the attachment titled “Guided Access HMO additional details NV.pdf” to view the Revised Medical Policies and Clinical Guidelines for Nevada.

## CORRECTION: Resources to support your diverse patient panel

Published: Oct 1, 2021 - **State & Federal** / Medicaid

*Medicaid*

****This article originally published in the July edition of *Network Update*. The original article was missing the last two paragraphs.****

As patient panels grow more diverse and needs become more complex, providers and office staff need more support to help address patients' needs. Anthem Blue Cross and Blue Shield Healthcare Solutions (Anthem) wants to help.

**Cultural competency resources**
Here is an overview of the cultural competency resources available on our provider website.

- *Cultural Competency and Patient Engagement* includes:
- The impact of culture and cultural competency on healthcare.
- A **cultural competency continuum**, which can help providers assess their level of cultural competency.
- Disability competency and information on the *Americans with Disabilities Act* (*ADA*).
- *Caring for Diverse Populations Toolkit* includes:
- Comprehensive information, tools and resources to support enhanced care for diverse patients and mitigate barriers.
- Materials that can be printed and made available for patients in provider offices.
  - Regulations and standards for cultural and linguistic services.

- *My Diverse Patients* offers:
- A comprehensive repository of resources to providers to help support the needs of diverse patients and address disparities.
- Courses with **free** continuing education credit through the American Academy of Family Physicians.
  - Free accessibility from any device (for example, desktop computer, laptop, phone or tablet), no account or login required.

To access these resources, go to **providers.anthem.com/nv** > Manuals, Directories, Training & More > Tutorials, Reference Guides and Other Resources.

In addition, providers can access **Stronger Together**, which offers free resources to support the diverse health needs of all people where they live, learn, work and play. These resources were created by our parent company in collaboration with national organizations and are available for you to share with your patients and communities.

**Prevalent non-English languages (based on population data)**
Like you, Anthem wants to effectively serve the needs of diverse patients. It's important for us all to be aware of the cultural and linguistic needs of our communities, so we are sharing recent data about the prevalent non-English languages spoken by 5% or 1,000 individuals in Nevada.[1]

| Prevalent non-English languages in NV |
| --- |
| Spanish |

**Language support services**
As a reminder, Anthem provides language assistance services for our members with limited English proficiency (LEP) or hearing, speech, or visual impairments. Please see the provider manual for details on what is available and how to access resources. In addition, the cultural competency resources shared above provide guidance on communicating and serving diverse populations effectively.

# Diabetes testing and screening HEDIS measures

Published: Oct 1, 2021 - **State & Federal** / Medicaid

*Medicaid*

**Comprehensive Diabetes Care HEDIS® measure**

The Comprehensive Diabetes Care HEDIS measure evaluates the percent of adult members 18 to 75 years of age with diabetes (type 1 and type 2) who had each of the following during the measurement year:

- Hemoglobin A1c (HbA1c) testing
- HbA1c poor control (>9.0%)
- HbA1c control (<8.0%)
- Retinal eye exam performed
- Blood pressure control (<140/90 mm Hg)

**Kidney Health Evaluation for Patients with Diabetes**

Additionally, the Kidney Health Evaluation for Patients with Diabetes measure was added as a first year HEDIS measure in 2020. This measure evaluates the percent of members 18 to 85 years of age with diabetes who received a kidney health evaluation, including an estimated glomerular filtration rate (eGFR) and a urine albumin-creatinine ratio (uACR).

**Record your efforts**

Document results in the in the member's medical record: HbA1c tests and results, retinal eye exam, blood pressure, urine creatinine test, GFR test.

**Helpful tips:**

- Have reminders set in your electronic medical record (EMR) to alert staff when a patient's screenings are due.
- Provide reminders to patients for upcoming appointments and screenings.
- Draw labs in your office if available or refer patients to a local lab for screenings.
- Refer patients to participating eye professionals for annual retinal eye exams.

- Follow up on lab test, eye exams and specialist referrals and document in your chart.
- Telephone visits, e-visits and virtual check-ins are acceptable settings for blood pressure readings and should be recorded in the chart.
- Include Category II reporting codes on claims to reduce the burden of HEDIS medical record review.
- Educate patients on topics (for example, home monitoring of blood sugar and blood pressure, taking medications as prescribed, and other healthy lifestyle education like diet, exercise, and smoking cessation).

**Other available resources:**

- Clinical Practice Guidelines are available on our provider self-service website.
- Contact the Health Plan for a copy of *Quality Measures Desktop Reference for Medicaid Providers* and the *HEDIS Benchmarks and Coding Guidelines for Quality*.
- Diabetes programs may be available to our members, contact your Provider Solutions representative for more information.

## New reimbursement policy: Sexually Transmitted Infections Testing (Professional)

Published: Oct 1, 2021 - **State & Federal** / Medicaid

*Medicaid*
*(Effective 01/01/22)*

Anthem Blue Cross and Blue Shield Healthcare Solutions (Anthem) allows reimbursement of sexually transmitted infection (STI) tests unless provider, state, federal, or CMS contracts and/or requirements indicate otherwise. We consider certain STI testing CPT® codes to be part of a laboratory panel grouping. When Anthem receives a claim with two or more single tests laboratory procedure codes reported, we will bundle those two or more single tests into the comprehensive laboratory procedure code listed below.

**Applicable single STI CPT codes:**

- 87491: Infectious agent detection by nucleic acid (DNA or RNA); chlamydia trachomatis, amplified probe technique
- 87591: Infectious agent detection by nucleic acid (DNA or RNA); neisseria gonorrhoeae, amplified probe technique
- 87661: Infectious agent detection by nucleic acid (DNA or RNA); trichomonas vaginalis, amplified probe technique

**Applicable comprehensive code:**

- 87801: Infectious agent detection by nucleic acid (DNA or RNA), multiple organisms; amplified probe(s) technique

Anthem will reimburse the more comprehensive, multiple organism code for infectious agent detection by nucleic acid, amplified probe technique (CPT code 87801), when two or more single test CPT codes are billed separately by the same provider on the same date of service. Reimbursement will be made based on a single unit of CPT code 87801 regardless of the units billed for a single code. No modifiers will override the edit.

For additional information, please review the Sexually Transmitted Infections Testing — Professional reimbursement policy at providers.anthem.com/nv.

## Prior authorization updates for specialty pharmacy

Published: Oct 1, 2021 - **State & Federal** / Medicaid

*Medicaid*

Effective for dates of service on and after November 1, 2021, the following specialty drug codes from current or new clinical criteria documents will require prior authorization.

Please note, inclusion of national drug code (NDC) on your claim will help expedite claim processing of drugs billed with a not otherwise classified (NOC) code.

Visit the Clinical Criteria website to search for the specific clinical criteria listed below.

| *Clinical Criteria* | HCPCS or CPT® code(s) | Drug | Drug classification |
|---|---|---|---|
| ING-CC-0170 | J1823 | Uplizna | Immunosuppressive agents |
| ING-CC-0172 | J3490, J3590, C9071 | Viltepso | Muscular dystrophies |
| ING-CC-0173 | J3490, J3590 | Enspryng | MISC conditions |
| ING-CC-0174 | J3490, J3590, C9399 | Kesimpta | Multiple sclerosis |
| ING-CC-0168 | J9999, C9073 | Tecartus | CAR-T |
| ING-CC-0171 | J9223 | Zepzelca | Cancer |
| ING-CC-0169 | J9316 | Phesgo | Cancer |
| ING-CC-0175 | J9015 | Proleukin | Cancer |
| ING-CC-0176 | J9032 | Beleodaq | Cancer |
| ING-CC-0178 | J9262 | Synribo | Cancer |
| ING-CC-0177 | J3304 | Zilretta | Osteoarthritis |
| ING-CC-0002 | Q5122 | Nyvepria | Blood cell deficiency |
| ING-CC-0038 | J3110 | Forteo | Osteoporosis |
